

WORLD NO TOBACCO DAY #WNTD2022

Theme: Tobacco A Threat To Our Environment

WNTD is one of 11 official global public health campaigns marked by the WHO, and is observed every year on 31st May to make tobacco users aware of the harmful effects and the opportunities to lead a healthier life. The theme for 2022 World No Tobacco Day is "Tobacco is killing us and our planet".

Reflections

Dr. Neelam Patel (Additional Director, MoHFW, Gujarat) expressed that peer pressure; media and cinema are the major factors leading to addiction of tobacco and its products

Dr. Jayesh Solanki (State Epidemiologist) emphasised on the fact that doctors play an important role in controlling the addiction of tobacco and its products through counselling

Adv. Anant Christian (Founder President – Faith Foundation) Judicial activism in the form of PIL have been instrumental in act formulation and stricter implementation by giving each enlightened citizen the right to health and also constitutional remedy. Implementation of COTPA 2003 is an exemplary evidence of the same along with that need of rehabilitation.

Susan Samson (Director Program, Faith Foundation) It is imperative to understand that tobacco is not only a health and economic threat but also an environmental threat with the plastic, paper, foil and cigarette butts littering the land and oceans. Tobacco is a threat to the environment, the only one planet we have

Dr. Hitendra Patel (Standing Committee Chairman Municipal Corporation of Vadodara) highlighted the fact that Tobacco products not only harms the human body but equally damages the environment due to plastic waste disposal. So each individual should take due responsibility to avoid this damage to the environment.

Mr. Akshay Agnihotri (Field Officer, Faith Foundation) Quitting Tobacco use is foremost important step for saving the environment. Each year tons of waste is added to the landfills causing a great damage to our planet. Let's be Environment, Health and Society friendly and Quit the use of Tobacco today

Aditya Singh (BALLB, MSU Baroda) Smoking is like cutting onion it affects you and the people beside you. Tobacco smoke contains chemicals that weaken the body's immune system, making it more susceptible to disease. Swear by a slogan - "Commit to Quit"

List of Team members

1. Jignesh Bariya (Field officer)
2. Supriya Sonavane (Accountant)
3. Pravin Dubey (Counselor)
4. Vedant Makwana (Volunteer)
5. BALLB & LLB Students, MSU, Vadodara : Batch 2021-22
